

PINDAN CONTRACTING ACP USE POLICY

Pindan Contracting Pty Ltd ("Pindan") will not make use of any Aluminium Composite Panel ("ACP") products that could cause harm to or pose a safety risk to individuals and/or the greater community. Pindan is committed to highest ethical standards, responsible corporate governance and compliance with all codes of practice and applicable laws. References in this policy to Pindan include its related entities as defined in subparagraph 3(2) of the Building Code 2016.

Purpose:

The purpose of this policy is to:

- > Outline Pindan's position with respect to the use of ACP products;
- > Outline responsibilities of Pindan staff and representatives in upholding Pindan's standards; and
- > Promote ethical business practices to advance Pindan's position in the marketplace and with key clients.

Scope:

This policy applies to all Pindan employees and other parties acting as representatives or agents of Pindan.

Tony Gerber
Managing Director
June 2019

Procedure:

Design & Construct Projects:

As reasonably possible, Pindan will not specify the use of ACP for any significant portion of a building envelope.

Where a client does require the inclusion of ACP, then such inclusion must be limited to non-structural elements; Further to this, in these instances, the specified ACP must be a fully tested product to comply with AS1530(1) and the BCA Specification C1.1.

Construct Only Projects:

In the event that ACP is nominated or specified, as far as reasonably possible, Pindan will recommend an alternative building material be used, to achieve a similar outcome.

In circumstances where ACP is specified and no alternative will be considered, the specified ACP must be a fully tested product to comply with AS1530(1) and the BCA Specification C1.1.
